## CS204 QUIZ 1 FILE BY TANVEER ONLINE ACADEMY

What is hardware and/or software that protects computers from intruders?  Amazon.com comes under the following model  What floods a Web site with so many requests for service that it slows down or crashes?  What scrambles the contents of a file so you can't read it without having the right decryption key?  Cyber Culture Language is  Public key cryptography is also known as	Security procedures can:	Reduce but not
What is hardware and/or software that protects computers from intruders?  Amazon.com comes under the following model What floods a Web site with so many requests for service that it slows down or crashes? What scrambles the contents of a file so you can't read it without having the right decryption key?  Cyber Culture Language is Public key cryptography is also known as	Source Process of the	
from intruders?  Amazon.com comes under the following model  What floods a Web site with so many requests for service that it slows down or crashes?  What scrambles the contents of a file so you can't read it without having the right decryption key?  Cyber Culture Language is  Public key cryptography is also known as	What is hardware and/or software that protects computers	
Amazon.com comes under the following model What floods a Web site with so many requests for service that it slows down or crashes? What scrambles the contents of a file so you can't read it without having the right decryption key?  Cyber Culture Language is Public key cryptography is also known as		
What floods a Web site with so many requests for service that it slows down or crashes?  What scrambles the contents of a file so you can't read it without having the right decryption key?  Cyber Culture Language is  Public key cryptography is also known as		B2C
that it slows down or crashes?  What scrambles the contents of a file so you can't read it without having the right decryption key?  Cyber Culture Language is  Public key cryptography is also known as	<u> </u>	Denial-of-service
without having the right decryption key?  Cyber Culture Language is  Public key cryptography is also known as		
without having the right decryption key?  Cyber Culture Language is  Public key cryptography is also known as		
Cyber Culture Language is Public key cryptography is also known as		
Public key cryptography?  Cipher technique uses "shift by 3" rule in encrypting the plain-text.  Which process can prevent data from lose due to computer problems or human errors?  Who breaks into other people's computer systems and steals and destroys information?  In hybrid approach key is used to decrypt session key and key to decrypt cipher text.  Collecting personal information and effectively posting as an other individual is known as the crime of is the process or mechanism used for converting ordinary plain text into garbled non-human readable text vice-versa.  Which of the following can a virus do?  The method of hiding in such a way as to hide its substance is called encryption.  A web site is being accessed by referencing a that identifies the site.  In both ends must agree upon single shared key for encryption and decryption of messages and keep the key secret between them.  Which of the following is an example of a cyber crime?  Spam Emails  Internet is owned by  No body owns internet  Backup		No Specific Language
Cipher technique uses "shift by 3"  Caesar cipher  rule in encrypting the plain-text.  Which process can prevent data from lose due to computer problems or human errors?  Who breaks into other people's computer systems and steals and destroys information?  In hybrid approach key is used to decrypt session key and key to decrypt cipher text.  Collecting personal information and effectively posting as an other individual is known as the crime of is the process or mechanism used for converting ordinary plain text into garbled non-human readable text & vice-versa.  Which of the following can a virus do?		
Cipher technique uses "shift by 3" rule in encrypting the plain-text.  Which process can prevent data from lose due to computer problems or human errors?  Who breaks into other people's computer systems and steals and destroys information?  In hybrid approach key is used to decrypt session key and key to decrypt cipher text.  Collecting personal information and effectively posting as an other individual is known as the crime of is the process or mechanism used for converting ordinary plain text into garbled non-human readable text & vice-versa.  Which of the following can a virus do?  The method of hiding in such a way as to hide its substance is called encryption.  A web site is being accessed by referencing a that identifies the site.  In both ends must agree upon single shared key for encryption and decryption of messages and keep the key secret between them.  Which of the following is an example of a cyber crime? rule in encrypting the plain-text.  Which process can prevent data from lose due to computer problems or human errors?  Who breaks into other people's computer systems and steals and destroys information?  In hybrid approach key is used to decrypt session key and key to decrypt cipher text.  Collecting personal information and effectively posting as an other individual is known as the crime of is the process or mechanism used for converting ordinary plain text into garbled non-human readable text & vice-versa.  Which of the following can a virus do?  The method of hiding in such a way as to hide its substance is called encryption.  A web site is being accessed by referencing a that identifies the site.  In both ends must agree upon single shared key for encryption and decryption of messages and keep the key secret between them.  Which of the following is an example of a cyber crime?  Spam Emails  Internet is owned by No body owns internet  What is the process of making a copy of the information		Caesar cipher
Which process can prevent data from lose due to computer problems or human errors?  Who breaks into other people's computer systems and steals and destroys information?  In hybrid approach key is used to decrypt session key and key to decrypt cipher text.  Collecting personal information and effectively posting as an other individual is known as the crime of is the process or mechanism used for converting ordinary plain text into garbled non-human readable text & vice-versa.  Which of the following can a virus do?		1
problems or human errors?  Who breaks into other people's computer systems and steals and destroys information?  In hybrid approach key is used to decrypt session key and key to decrypt cipher text.  Collecting personal information and effectively posting as an other individual is known as the crime of is the process or mechanism used for converting ordinary plain text into garbled non-human readable text & vice-versa.  Which of the following can a virus do?		Backup
Who breaks into other people's computer systems and steals and destroys information?  In hybrid approach key is used to decrypt session key and key to decrypt cipher text.  Collecting personal information and effectively posting as an other individual is known as the crime of is the process or mechanism used for converting ordinary plain text into garbled non-human readable text & vice-versa.  Which of the following can a virus do?		•
steals and destroys information?  In hybrid approach key is used to decrypt session key and key to decrypt cipher text.  Collecting personal information and effectively posting as an other individual is known as the crime of is the process or mechanism used for converting ordinary plain text into garbled non-human readable text & vice-versa.  Which of the following can a virus do?	•	Hackers
In hybrid approach key is used to decrypt session key and key to decrypt cipher text.  Collecting personal information and effectively posting as an other individual is known as the crime of is the process or mechanism used for converting ordinary plain text into garbled non-human readable text & vice-versa.  Which of the following can a virus do?		
collecting personal information and effectively posting as an other individual is known as the crime of  is the process or mechanism used for converting ordinary plain text into garbled non-human readable text & vice-versa.  Which of the following can a virus do?  The method of hiding in such a way as to hide its substance is called encryption.  A web site is being accessed by referencing a that identifies the site.  In both ends must agree upon single shared key for encryption and decryption of messages and keep the key secret between them.  Which of the following is an example of a cyber crime?  Internet is owned by  No body owns internet  Backup	In hybrid approach key is used to decrypt	Public, session
Collecting personal information and effectively posting as an other individual is known as the crime of  is the process or mechanism used for converting ordinary plain text into garbled non-human readable text & vice-versa.  Which of the following can a virus do?  The method of hiding in such a way as to hide its substance is called encryption.  A web site is being accessed by referencing a that identifies the site.  In both ends must agree upon single shared key for encryption and decryption of messages and keep the key secret between them.  Which of the following is an example of a cyber crime?  Spam Emails  Internet is owned by  No body owns internet  What is the process of making a copy of the information  Backup	session key and key to decrypt cipher text.	
an other individual is known as the crime of  is the process or mechanism used for converting ordinary plain text into garbled non-human readable text & vice-versa.  Which of the following can a virus do?  The method of hiding in such a way as to hide its substance is called encryption.  A web site is being accessed by referencing a that identifies the site.  In both ends must agree upon single shared key for encryption and decryption of messages and keep the key secret between them.  Which of the following is an example of a cyber crime?  What is the process of making a copy of the information  Cryptography  Cryptography  Cryptography  Cryptography  None of the above  Plain-text  Symmetric encryption  Symmetric encryption  Symmetric encryption  Spam Emails  No body owns internet	Collecting personal information and effectively posting as	<b>Identity Theft</b>
ordinary plain text into garbled non-human readable text & vice-versa.  Which of the following can a virus do?  The method of hiding in such a way as to hide its substance is called encryption.  A web site is being accessed by referencing a that identifies the site.  In both ends must agree upon single shared key for encryption and decryption of messages and keep the key secret between them.  Which of the following is an example of a cyber crime?  Internet is owned by  No body owns internet  What is the process of making a copy of the information  Backup		
ordinary plain text into garbled non-human readable text & vice-versa.  Which of the following can a virus do?  The method of hiding in such a way as to hide its substance is called encryption.  A web site is being accessed by referencing a that identifies the site.  In both ends must agree upon single shared key for encryption and decryption of messages and keep the key secret between them.  Which of the following is an example of a cyber crime?  Internet is owned by  No body owns internet  What is the process of making a copy of the information  Backup	is the process or mechanism used for converting	Cryptography
Which of the following can a virus do?  The method of hiding in such a way as to hide its substance is called encryption.  A web site is being accessed by referencing a that identifies the site.  In both ends must agree upon single shared key for encryption and decryption of messages and keep the key secret between them.  Which of the following is an example of a cyber crime?  What is the process of making a copy of the information  None of the above Plain-text  Plain-text  Symmetric encryption of the symmetric		
The method of hidingin such a way as to hide its substance is called encryption.  A web site is being accessed by referencing athat identifies the site.  Inboth ends must agree upon single shared key for encryption and decryption of messages and keep the key secret between them.  Which of the following is an example of a cyber crime?  Spam Emails  No body owns internet  What is the process of making a copy of the information  Backup	vice-versa.	
substance is called encryption.  A web site is being accessed by referencing a	Which of the following can a virus do?	None of the above
A web site is being accessed by referencing a that identifies the site.	The method of hidingin such a way as to hide its	Plain-text
that identifies the site.  In both ends must agree upon single shared key for encryption and decryption of messages and keep the key secret between them.  Which of the following is an example of a cyber crime?  Internet is owned by  No body owns internet  What is the process of making a copy of the information  Backup	substance is called encryption.	
that identifies the site.  In both ends must agree upon single shared key for encryption and decryption of messages and keep the key secret between them.  Which of the following is an example of a cyber crime?  Internet is owned by  No body owns internet  What is the process of making a copy of the information  Backup	A web site is being accessed by referencing a	Uniform resource
shared key for encryption and decryption of messages and keep the key secret between them.  Which of the following is an example of a cyber crime?  Internet is owned by  No body owns internet  What is the process of making a copy of the information  Backup	·	locator (URL)
keep the key secret between them.Spam EmailsWhich of the following is an example of a cyber crime?Spam EmailsInternet is owned byNo body owns internetWhat is the process of making a copy of the informationBackup	Inboth ends must agree upon single	Symmetric encryption
keep the key secret between them.Spam EmailsWhich of the following is an example of a cyber crime?Spam EmailsInternet is owned byNo body owns internetWhat is the process of making a copy of the informationBackup	shared key for encryption and decryption of messages and	
Internet is owned by  What is the process of making a copy of the information  Backup		
Internet is owned by  What is the process of making a copy of the information  Backup	Which of the following is an example of a cyber crime?	Spam Emails
stored on a computer?	What is the process of making a copy of the information	Backup
	stored on a computer?

	C
The practice of forging a return address on an e-mail, so	Spoofing
that the recipient is fooled into revealing private	
information is termed?	
Virus can reach to your computer in which way?	All
What is "I" stands in CIA triad?	Integrity
is a means of storing & transmitting information	Cryptography
in a specific format so that only those for whom it is	
planned can understand or process it.	
Which one is a computer threat?	Hacking
A Computer Virus is?	A Computer program
	that can replicate it self
A web site may be accessible through	All of the above
What is short for malicious software (is software designed	Malware
	Maiwaic
to disrupt computer operation, gather sensitive	
information, or gain unauthorized access to computer	
systems)?	
What might identity thieves do with your identity?	All of the above
Most individuals are familiar with which form of e-	B2C
commerce?	
What is an encryption system that uses two keys: a public	Public key encryption
key that everyone can have and a private key for only the	
recipient?	
Mechanism to protect private networks from outside attack	Firewall
is	
In the dimensions are physical in nature	Traditional Commerce
and all transactions are performed off-line.	
All of these are suggestions for safe computing EXCEPT:	Open all e-mail
An of these are suggestions for safe computing EXCELL.	messages but open
4b - b	them slowly
are the building blocks of the website.	Web pages
Process of buying, selling or exchanging products, services	E-commerce
and information through computer networks is	
called	
Each electronic document on the web is called	Web page
a	
security procedures can	Reduce
The network formed by the co-operative interconnection of	Internet
a large number of computer networks is called	
What is "A" stands in CIA triad?	Availability
A combination of physical and digital dimensions is known	Hybrid
	LIYDIIG
The trading or facilitation of trading in products or services	
	E commones
The trading or facilitation of trading in products or services	E-commerce
using computer networks, such as the Internet is termed as	E-commerce
	E-commerce Unauthorized Access

All Quizzes Files Available on Paid Basis WhatsApp +92-345-3282256

When plain text is converted to unreadable format, it is	Cipher-text
termed as	
E-Commerce is not suitable for	Online job searching
The Internet is	<b>Network of networks</b>
If cyber culture grows then those who are cut off from cyber culture will feel	Isolated
programs are used as the back doors.	Trojan Horse
is a discussion or informational site	Blog
published on the World Wide Web consisting of discrete	
entries typically runs by an individual or a small group.	
Which type of e-commerce focuses on consumers dealing with each other?	C2C
What software detects and removes computer viruses?	Antivirus
What is an encryption system that uses two keys: a public	<b>Public key encryption</b>
key that everyone can have and a private key for only the recipient?	
In internet terminology IP means	<b>Internet Protocol</b>
When a customer of a website are unable to access it due to	Denial of Service
bombardment of fake traffic, it is known as	Attack
What is the most common tool used to restrict access to a computer system?	Passwords
An E-business that allows consumer to name their own	C2B
price for products and services is following which e-	
business model?	
Public key encryption uses multiple keys. One key is used to	public, private
encrypt data, while another is used to decrypt data. The key	
used to encrypt data is called the key, while the key	
used to decrypt data is called the key.
